

Ficus carica

# Brown Turkey

'Brown Turkey' is a large fruited variety, best suited for fresh use. It has bronze skin, red flesh, and may be slightly hardier than most of the other varieties. May produce a large 2nd crop. Is somewhat dwarfing.

The large leaves give this plant a tropical feel, and if left unpruned, can be a very bold statement.

Prefers full sun & well drained soil, but will tolerate less of either.

Pollinator friendly.

Relatively wildlife resistant.
