

Hakonechloa macra

Albo-striata

The white-variegated hakone grass has been unjustly overshadowed by its gold-leaved kin. Its handsome striped foliage provides a bright accent in a shady garden. The effect is similar to that of ribbon grass (Phalaris), without the invasive tendency. Grows larger than 'Aureola'. 2' x 2'+

Common Name

'Albo-Striata' Japanese Forest Grass

Variety

Albo-striata

Zone

Zone 5

Mature Size

24-36"H

Bloom Time

Late Summer

Plant Type

Grasses
